RAISED IN INDIA

## WIDE RANGE OF PRODUCTS CAPABLE OF HANDLING ANY SIZE OF PROJECTS.

### LARRAY

*Line-array*

Perfect in live sound reinforcement solution to be used in small to medium live events, as FOH, Out fill or as Front fill.

### LOUD

*System, Line-array*

The ultimate in “all-in-one” complete and convenient “plug-n-play” PA system solution for small venues with class D amp & DSP.

### BASS-F

*Subwoofer*

Flyable subwoofers with great accuracy in a very compact and robust enclosure achieving extremely high performance.

### INSTALL

*Installation Speaker, Multipurpose Speaker*

The right choice to anyone who wants to install speakers into a wall or ceiling with high quality sound standards for modern indoor spaces.

### DUAL PRO

*Multipurpose Speaker*

As standalone FR sys, stage monitor or mid-hi unit in combination with a sub, designed to suite various applications due to its performing capabilities

### HL

*Subwoofer*

Horn loaded subwoofers engineered to provide maximum output with minimal distortion and smooth extended low frequency response

### INSTALL SUB

*Subwoofer, Installation Speaker*

Universally useable compact subwoofer solution to act as a supplement in PA installations in a visually unobtrusive enclosure.

### GROOVE

*Stage Monitor*

Surprising sonic performance inside a compact and elegant package for sound reinforcement stage applications.

### RADIAL

*Installation Speaker*

The ideal solution for short or medium range environments, music and speech reproduction in 100V sound reinforcement systems.

### PURE

*Installation Speaker*

Designed to meet the highest demands for speech intelligibility and visual appearance, built in a lightweight and elegant AL profile.

### WX(IP54)

*Installation Speaker*

Designed for shops, galleries, supermarkets and any outdoor venue that achieves excellent results and acoustic performance.

### CS

*Installation Speaker*

Range of in-ceiling speakers designed for commercial audio applications taking advantage of coaxial transducers to provide quality results.

### LOOP

*System*

The ultimate in “all-in-one” complete and convenient “plug-n-play” PA system solution for small venues with class D amp & DSP

### MPS

*Multipurpose Speaker*

Compact 2-way arrayable point source enclosures designed as to combine the versatility of a point source with the perfect “arraylability” of a line array

### BASS

*Subwoofer*

The perfect choice for sound reinforcement challenges demanding high SPL and natural-sounding bass response.

### SIRIUS

*Power Amplifier*

A superior solution that provides users with a "Plug & Play", amplified audio distribution solution for touring systems and Line arrays.

MOOSE.
